Jim,

From what I have seen on other Deepwater rigs TOI should be sending in at lease these daily reports.

- 1) Their Morning reports
- 2) IADC reports sent in monthly.
- 3) Sub sea reports
- 4) Maintenance Reports
- 5) Marine daily reports
- 6) POB List
- 7) In Hurricane season preparation and evacuation times.
- 8) Mud reports
- 9) ROV dive reports.
- 10) Incidents / accident reports if any
- 11) After noon up date reports
- 12) Boat and helicopter logistics which is supplied by BP.

Walter

In addition to gathering data regarding the Negative testing. Could you also determine if we have a Negative Testing Procedure or Design Standard contained within any of our policy, procedure or ETP documents - or anywhere else you may think it could be.

Could you please have look at the data requests we have submitted to TOI. Could you also try to list from your knowledge what reports the TOI offshore team send in on a daily basis (Morning reports / Maintenance Reports / Afternoon Reports etc) so that we can make a request for this information.

Thanks, Jim
