I don't see a problem with it but, it does open the chance for lost revenue

I know you guys are busy right now but I wanted you to take a look at this second draft. This 2nd draft reflects Curtis Jackson's "offer" with a little tweaking on my part (to make the BOP pulls caused by mechanical problem as opposed to abnormal wear etc.) As you know, our first offer was for BP to pay for any BOP pulls caused by a VBR failing to test. We can hold firm on our offer or we can accept his offer if you think the chances of a VBR failing a 2nd time on any one well are sufficiently remote.

What do you guys think?
