Subject: FW: Watrebased FAS pills

Leo,

Had a discussion with John and he ran it by the Environmental group and we cannot dump them. The want to dispose if we cannot use as spacers. I am checking on the possibility of this option. Given the water based nature and the fact that we will T&A, may not want to us as spacer and dump.

Doyle,

I contacted James Hoggan BP environmental specialist and he said that since it has not been in the well we will have to send it in for disposal. I have left a voice message with Tracy Dyer the BP waste specialist and have copied her on this email.

You will need to contact Tracy to answer her questions about what is in the pill and she will have to send you the paperwork that must follow the waste to the disposal facility.

I have also attached Tracy and James' contact information.

If you have any more questions, or need anything else, let me know.

Thanks,

John

Subject: Waterbased FAS pills

John,

We need to have a conversation about these pills. They are water based and they have dumped them on Enterprise but need clarification from bp as to what we can and should do with them.
