Ed,

Yes we do have the newer Rochester cables. As far as I know we will not need any inlay done to the sem cover. No upgrades done to the SEM other than the battery upgrade for dead man system. If you could get us a estimated cost for the work on the pod would be greatly appreciated.

Mark,

Are all solenoid valves -63? Do they have the newer cables?  
 Do you need inlay on SEM cover?  
 Any upgrades on SEM required?

It might be better if you ship the equipment to Cameron for inspection and evaluation so that I can provide a detailed quote.

Regards,

Mark,

The contact for shop work will be Ed Villamarin. I have copied him on this e-mail.

Ed.

Please provide quote for the requested information.

Carter,

We have our spare pod split here on the rig now. We are needing some repairs made to electrical package. We will supply the pie connectors. Can you give me a quote for the repair needed on this pod? Let me know if you need any more information.

This is the work that needs to be done to the electronic side:

- a. Install battery upgrade for dead man system.
- b. Replace all pie connectors.
- c. Perform all required test on solenoids and wires.
- d. FAT after all electrical modifications are complete.
