George,

Sorry, I missed you yesterday. I had a talk with Shawn on the rig. Shawn feels that it would be best if Alex did not return to the rig. Mike Murphy will be out on Friday. Mike has a long history with Sperry. Mike worked for several years on the Marianas when Shell had it. Mike has over 15 years with Sperry. I am sure you will be pleased. We will still need a replacement next week for Alex. I have talked with the Sperry team about this. I will be at BP tomorrow. I would like to discuss this with you further.

thanks

Earl,

I'm out here on the Marianas. Alex is not getting the job done for the team. We have real concerns as we are less than 2 weeks from drilling into an zone that could be anywhere from high losses to a well control situation.

He is not getting the basics right, ie correct block weight, depth, no communication to rig floor when he is going to be away from the unit.

What can you do to correct this ASAP?

Thanks
