Subject: MI Engineer for Horizon Rig & Macondo Well
Importance: Normal

Hi Doyle,

Are you still the MI engineer for the Horizon rig & thus for the Macondo well?

If so Galina Skripnikova is the petro from Exploration following the well.

She contacted me & Jennifer Nelson on Thursday & there is now a 10% chance of a bypass core.

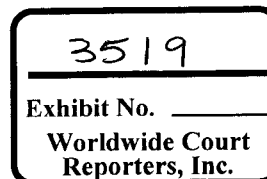

I provided Galina as your name for contact for D2O tracer.

Does MI currently have any D2O tracer on hand? If so what volume?

The Macondo well could be at core point in bypass (if it occurs) on ~March 19 so not sure we have time to order D2O tracer.

Thanks, Ramsey
