Importance: Normal

Al and Tom,

Let's buy the 7", and we'll take our chances on it's actual use. Plan on starting the breakdown and rig prep early next week.

Also, please secure the required float equipment and backups

Probably about 3 days. I would just point out that since Nexen does want to sell this pipe, they will probably sell it to the first firm offer so there is no guarantee this pipe will continue to be available. Changes are they won't sell it in the next few days but you never know what can happen. Also, we KNOW we can start on this work on Monday. However, further delays may impact the availability of crews to do the work.

One final remark on this pipe: since this pipe would be purchased specifically for Macondo and it really doesn't have much use elsewhere in GoM DW, this purchase would be charged directly to Macondo and would remain charged there, even if it isn't used, until we dispose of it.

Thanks

Al Crane

What's timing to get this work done on the pipe?

See Nexen's note below. Looks like they want us to commit to buying it before we do any prep work. Your call. If you want to proceed with buying it, we will need an approved requisition today.

Tom,

Nexen requires a firm commitment to purchase the pipe at the noted price per foot. Please advise your intent.

Pat,

For clarification, does Nexen require a firm intent to purchase or agreement to the purchase price of \$50.00 / ft. ?
BP does agree to the purchase price as noted, but would still like to service the pipe prior to commitment-to-purchase.

Please advise.

Gentlemen,

In reference to your proposal submitted for the 7" casing, Nexen must have a firm price for the casing prior to release or servicing of the material.
Nexen's proposed Sale of material:

7" 32.00# Q-125 HC HYD 513 R-3 USS w/ SD 6.000"
Qty: 133 Jts. / 6,142.30'
Price: \$50.00 / ft.

Please confirm your acceptance of subject sale of material.

Regards,

Pat Rincon

Pat,

Regarding the 133 joints of 7", 32#, HCQ-125, Hyd.513 pipe that Nexen has in Expert's Yard in Fourchon, BP would like the option of servicing this pipe all at BP's expense.

- Unbuck those joints that are currently in doubles.
- Clean and visually inspect ALL connections.
- Apply running compound on all connections
- (In the event that some connections are galled during the unbucking process, BP would repair all of those galled connections at BP expense)

Purchase of this pipe is contingent upon success of the well program for which this pipe is intended.

If BP elects not to purchase the pipe, BP will clean all connections and apply storage compound of Nexen's choice. All this will be at BP's expense.

In addition, should Nexen want this pipe moved to another storage location, BP will provide transportation to that location at BP's expense.

Please respond as soon as you can regarding this proposal, as we would like to proceed with this servicing early next week.

Thanks,

Tom Couch
