I have to say, I haven't heard that in over a year now. With that being said, I strive to continue on a positive future.

Sincerely,
James Ingram

Barry,

I just got off the phone with Owen, he did not have problem with loaning it out to the Inspiration. We are in the process of landing out, so this afternoon we shall be able to have this box upped and ready for shipment.

Materials,
Please advise of a location of how this needs to be sent in.

Sincerely,
James Ingram

Subject: Stack Pre-Charge Boost Pump

Mike/Mark,

The Inspirations nitrogen boost pump has not arrived on the rig and we will have to pre-charge the stack soon. I was informed the Horizon has a backup pump the Inspiration may be able to use. The rig is researching rental units but in case no rentals are available I would like to know the Horizon's boost pump is available. Please let us know. Thanks Barry
