NEXT ASSIGNMENT

VANCE Carpenter Halliburton

William + Leo comfortable with going forward

Review Bob - Rudy conversation

Drill pipe = 0 Bob opening kill line, How started  
Cementer called (Vance) described flow, Bob shut down  
Bob to talk to Dan.

• where was shut in - Bob or ?

Bob-Dan may have difficult time believing, most monitor on left side (Dan)

- New toolpusher Jason ~~son~~ bushy 4/15/18, long discussion

- Toolpusher said they stopped, Jason said "Dan Bob this happened  
the time"

Jason - all company men do negative test di. Gernately  
when heavy vessel & closed sumiter

Don - APD asked to do test via kill line, Jason - ok

Don ~~Jason~~ make sure kill line is full, then monitor them

Bob got better procedures for cement job from office

when Bob returned, 30 psi. showed

Pumped down kill line, closed off

Pressure building on drill pipe side

Leo pumping out sand traps, getting 500 bbl according to mud logs

720 - 750 negative test - to bed

Fire alarm first recognizable alert, PA sounded  
electricity off

Room  
310

in Houston. Bob to Joe, mudlogger, Zesp - 2nd stringer  
saw Don on deck, blood, appeared dead  
- No gas, displacement perfect

Best way to do this? Neg test of gas based mud  
Cement plug first
