Clint,

**As per our discussion about the 14.0 PPG SBM on the M/V Damon Bankston**

I have spoke to Mr. Don and he has confirmed that we will return 4500 bbls of 14.0 # SBM to MI for credit. This will leave 1000 bbls +/- of 14.0 PPG SBM on the vessel.

Plan Forward:

**Offload Deck Cargo**

**Load Out Cargo ( Outbound Horizion )**

**Fuel Vessel While Working Offload & Backload**

**Move Vessel to Mi Plant to pump off 4500 bbls of 14.0 PPG SBM ( This will leave 1000 bbls +/- of 14.0 PPG SBM on the vessel )**

**Vessel to return to Base to load out Weatherford Packer & Seal Assembly ( ETA = Fri AM )**

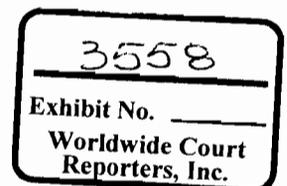

*Regards,*
