

[Steve Robinson Notebook]

DAILY QUIP MTR

SS-15 BIG BOLE II

Metal to Metal seal w/ elastomer backup

Macondo getting at 9 7/8" packoff "text book"

Send request to Jim Lucci re Charles Cullen

DON VIDUINS - Interviewed by Brian Moran, Jim Conry, Steve Robinson

Hole TD'd when he arrived

TAKEN KICK perhaps, lost returns, close to balance

Logging when arrived, logging okay

WIPER TRIP, Pumped 1000 - gas in 6000 ft

stayed in the longer but finally dropped in

Pumped out. Started pt on elevators @ 9 7/8 Linner top

plugged Casing out. Rm 9 7/8" x 7" (stack open entire line)

looses → Has mouse getting actions

Cement jobs went okay

B. Displacement good, buoyed ply

Set seal okay

Red. Pumped 1.5" of volume with DP.

TOP. ^{100 ft pipe above stroke} closed blind shear in test case

Rm to planned object

Disr. choke, kill, Boost w/ SW

Displ DP w/ SW. Pile seal by SW

Blind DP

SCOP, Built to press. They said it was normal

Not sure how much → CHECK KILL LINE SIDE. pumped a few strokes

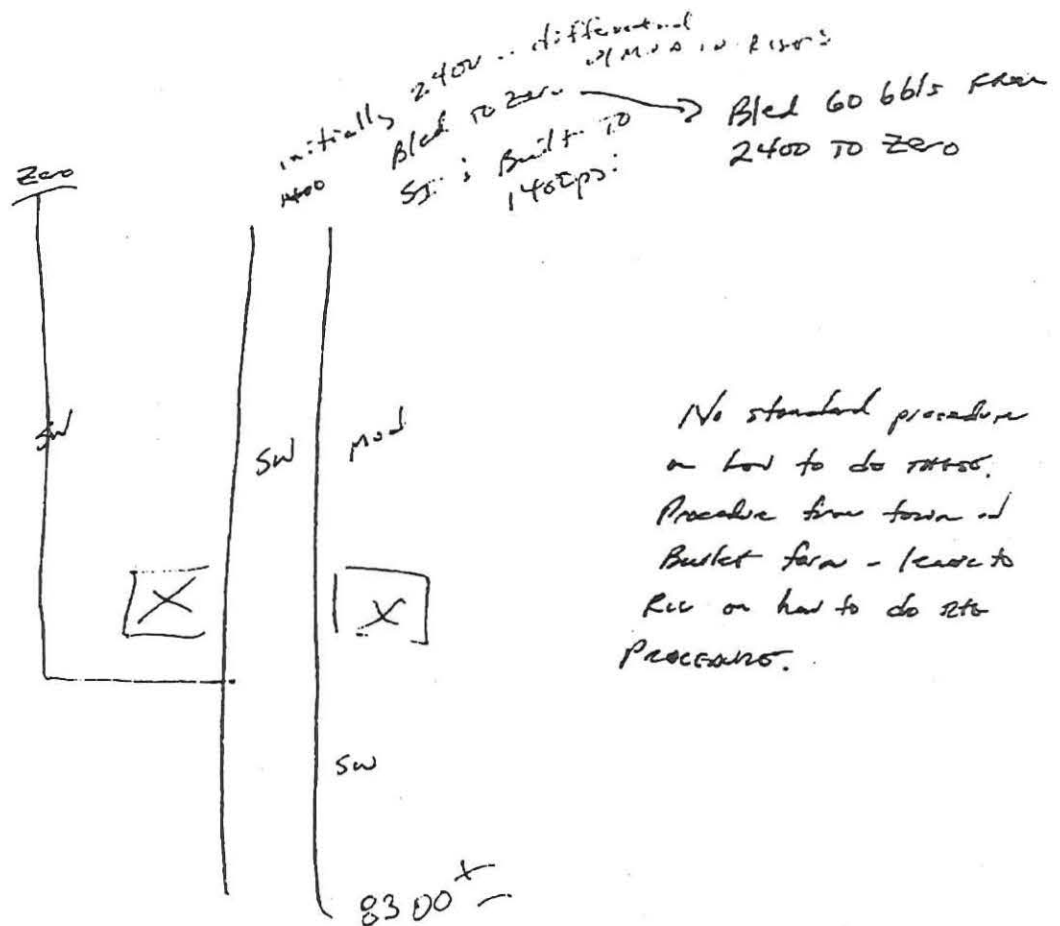

on KILL LINE it prevented. Blind over 660

Set Built 30 psi. Blind car 660 is locked

Fl 1/2 hr. DP had 1400 psi steady

Kaluzza was told by SA McCall
that Anderson
was called
to Anderson
company
NORWICH

Monitors for 30 mins. Called Hark to discuss.

SURFACE plug

Opened & started displacement

Displacement strokes came back on correct stroke count

RE STOPPED for SEVEN TESTS. WAS NOT FLOWING AS FAST AS HE KNOWS

- SPACER WT = 16.0 ppg, 450 bbls

SHOWN HAND & RWD GUP monitoring. MRO FUP said came back on RIGHT STROKES & LOOKED OKAY on TEST

PANEL

SEVEN TEST PASSED. Expected he was STOPPING AT THAT POINT GAVE OKAY TO START DUMPING

CAGUS comfortable w/ TEST, DOW MORE THAN TO CHECK IT
for 30 mins on KCU LINE

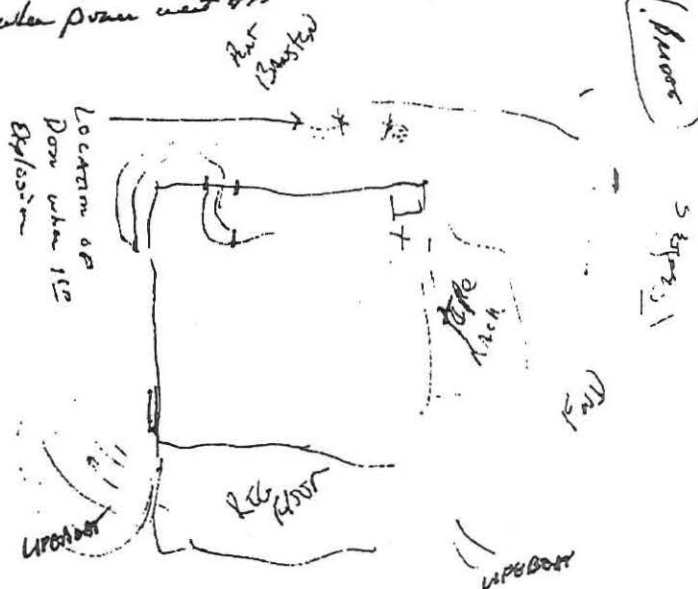

- Not sure why he called, curious about how

TRANSCORP guys had dismissed it as anything
serious & somewhat joked about ^{this} ~~the~~ concern
Ezell, Jason Anderson, Bob Kalra, Dewey Savette,
Mud Eng - Lee & Mud Eng - Gordon (they were changing
out also). Charles may have been there

Also said
HC was climbing
or had
closed

After Sharon took, who's back in office, 10-15 mins
later got A. call. Jason (TP) called & said
we're getting mud back & diverting returns to gas
buster & filling up quick. Started for floor.
chase hall up stairs toward sec - mud was
somewhere blowing anywhere. Positive it was
mud. Stopped & explosion occurred & power
went out. - Not sure exactly when power went off

Proceeded to BRIDGE. TO
HIT EDS. ~~Went~~ May
people on BRIDGE. CHAS
SUBSAS HANO ASSES ~~Went~~
EDS i. THEY WENT TO
panel i CHAS HIT BUTT
i everything lit - said
he saw gallon can't i
stab retract. Then
helped get people to
capotes, helped injured.
After everyone in journal 5
launched expunk. Got in Bankston

Started on Horizon in January - 4th Hitzel

14/14 Rotation

SPACE not STANARD POSTED IN DOCKHOUSE. CAUSE ALWAYS
GOOD ABOUT DOING IT. EXPECTS THAT THEY WERE
SPACED not correctly. 5 1/2" ACROSS SPACE.
TOO MUCH SPACE TO SEE TOP DRIVE.

ifend ntr

AD CALLED SR TP THAT THEY HAD A WELL CONTROL
problem

FIRST ARMS WERE WORKING.

CONS - BRIAN & MARK HARVE

Spoke w/ BRIAN more mostly & MARK
Sometimes. Negative test procedure
one by email - the manually op.
People copied so aware of procedures

Next will NINE Decomplate / PIA

Questions & Answers

What are the properties of the FORMER - get n/a.
Volume Flow back in 1st TEST - Don indicated 60 bbls
- did TRES go to TRES DANK or Halliburton
Look first on Spencer versus BBN - did not look at Spencer
Walk thru the Pumping sequence down choke / Kim
valves open or not

When was Lee Lambert - on floor in discussion during Neg Test
Who w/ Halliburton was in unit. Vane

450 bbls 11 Dec
WTL. B. 16.0/19

STEVE'S INTERVIEW W/ DON VIDRNE

1. HOW WELL WAS BEHAVING
2. NEG TEST
3. DURING EVENT
4. COMM PROTOCOL
5. MOC

HOLE MADE, LOGGING

1000 UNITS, GAS HUNG INTHERE FOR A WHILE
ON CLEAN UP RUN

PUMPED OUT TO 9 7/8, WORRIED ABOUT GAS COMMING IN

LEFT STACK OPEN WHOLE TIME

COMPLEX JOB BUT WENT OK

P TEST ON CASING (DOWN KILL LINE)

DRAW NEG TEST

DISPACED KILL, CITAKE, BOOST W/ SEW-WATER
450 BBL 16^{PPG} ADD FOLLOWED BY SPACER
FORSET

FOLLOWED BY SPACER

2400 PSI ON DRILL PIPE WHEN SHUT DOWN (16:52)
CLOSED ANULAR

BLEED OFF DRILL PIPE ~~50-150~~ → TO 0 (NO FLOW)

(BOB WAS ON FLOOR, I WASN'T)

SHUT IT IN ^{LINED UP ON HALBURTON} A BUILT UP TO SOME PRESS. (17:7)

TOTAL (2 BLEEDS) = 60 BBL'S (H)

BLEED OFF TO HALBURTON (CEMENT)

SEA
1725 - 1750 :
CLSD
KILL LINE : A FEW STROKES ON KILL LINE AND IT
PRESSURED (PERMIT REUT)
TOLD THEM IT WAS FULL
(WEREN'T THINKING PL

WATCHED KILL LINE FOR 30 MIN
T.O. CONVINCED
SENIOR :
• AVELL KALUSA
• ANDERSON,

SEE THIS ALL THE TIME "ANNULAR
COMPRESSION"
WT OF MUD IN RISER PRESS KILL LINE 11

FOUND IT HUMOROUS THAT DON WAS CONCERNED
FOR A LONG TIME
KALUSA CONVINCED FIRST, DON WATCHED KILL LINE
THEN BECAME CONVINCED IT WAS DEAD

1835 - 1950 DISCUSSION
CALLED HALLIBURTON ABOUT _____ (NOT 1400)

SECOND TEST WAS MONITORING KILL LINE

1949 WENT TO O ON DRILL PIPE TO HALLIBURTON
(15 BBLs ? CHECK WITH KALUSA)

HELPED INJURED TO CAPSULE
LAUNCHED CORRECTLY
BANKSTON

ON CAPSULE

~~GOOD SAID OIL + MUD~~

GOOD ABOUT BEING SPACED OUT STND PROCEDURE

NEG TEST : NOT STANDARD

BOTH PODS WERE LIVE

CREW RESPONDED WELL IN ABANDON
