Subject: Wall Street Journal article on Macondo well

No one from WWCI (that I am aware of) has spoken to this writer or the WSJ at all.

I am pretty sure this comes from the Exxon Mobil guys that walked out on the process. They visited a lot with us at the time, and it was clear that their position with respect to top kill, top hat and capping was pretty much in line with our recommendations. They didn't feel that BP was listening or had any interest in their input, or that BP was not showing any respect for EOM's contribution.

Thanks for the heads-up on the article.

Pat Campbell

Freddy & Pat,

Just wanted to make sure you'd seen this, in case we have to do any damage control with BP.
