Importance: High
Sensitivity: Confidential

Guys

In case you are like Bill and I, "procedure less", here is a copy I managed to talk my way into this evening.

Also attached is a "kill well plan -50 & 40 etc.xls" that shows some very interesting curves. It looks to me like we were definitely going down the casing annulus and were making a difference. Apparently this workbook was issued to the BP kill team. Our having this could cause my BP source problems if it were made public. Call me paranoid but when the well kill experts are not included in procedure generation and issue I see reasons I do not like.

The "kill profile 2.pdf" attachment shows the BJ curves for today's operation.

Regards

Chris Murphy
