Subject: FW: Debris in left hand drill string just upstream of kink

Importance: High

Gents,

We have confirmed debris in the left hand drill string just upstream of the kink. I do not want to interpret this but it is possible that it is "Junk Shot" material and would therefore imply communication between the left hand string and the choke and kill lines. At this stage we do not have clearance to remove this item from the string and certainly not from the site. How important is this to you? If you need it to be removed then I will get on to the lawyers right away to see what can be done.

Tom
