Criticisms of Dr. Gringarten – Convolution Analysis

- Dr. Gringarten assumes flow rate over 86 days to calculate flow rate over 86 days

- Dr. Gringarten’s fundamental premise that bottomhole pressure is known is wrong
  - Bottomhole pressure was not measured
  - Gringarten must assume a flow rate over 86 days to calculate bottomhole pressure
  - No BP/Anadarko expert has calculated a flow rate schedule
