1. Background 2. Overview 3. Analytical 4. Uncertainty 5. Numerical 6. What-if 7. Rebuttal

Roadmap

Overview

Analytical study

- Calibration point during well integrity test → ~53,000 STB/day
- Build wellbore and reservoir models
- Cumulative volume of oil released: 5.2 MMSTB
- Uncertainty assessment
- Numerical Study
- What-if Cases
- Rebuttal Cases
