

based on discussions with BP reservoir modelers and well test analysis				
Estimation of Reservoir Area				
Original Oil in Place	1.10E+08 std			
Formation Volume Factor (Oil Only)	2.55 m³/std			
Volume of oil in reservoir	2.82E+08 lb	1.5812E+09 ft³	1 barrel	5.615 ft³
Porosity	0.21			
Bulk volume of reservoir	0.37E+09 ft³			
Reservoir thickness	88 ft			
Area of aquifer	9.51E+07 ft²			
Square root of aquifer area	3.400 ft			
width	3.400 ft			
length	27,951 ft			
Reservoir and Oil Properties				
permeability	500 md	4.93E-13 m²	1 md	9.87E-16 m²
Sw	0.190			
formation, rock, or pore compressibility, cf	6.00E-06 psi⁻¹			
water compressibility, cw	3.00E-06 psi⁻¹			
oil compressibility, co	1.45E-05 psi⁻¹			
Total compressibility	1.94E-05 psi⁻¹ = (1-Sw)co + Sw'cw + cf		1 psi	6894.75728 N/m²
Oil density	0.568 g/cm³			
Oil viscosity	0.166 cp		1 cP	0.001 Nm² = kgm/s²
Production	45,000 - 40,000 std/d 115,209 - 102,400 bbl/d 646,848 - 574,978 ft³/d
