Re: m.d.
Attached is the final feedback from the Peer Assist on Top Preventer. This covers both the BOP on EOP and the Run/Value on EOP.
Since the review was completed the Stock on Stock option has been accepted as the preferred option with the Run on EOP.
Please note as a contingency option in the event the L250P cannot be recovered in the event it is the (lock) point on the wall. The full value alternative should not be progressed further.
There is much to be done for the BOP on EOP to be implemented with confidence and the view to get additional
