Install BOP

- Guidance system such that BOP is positively in place before landing assuming loss of visibility, involving ROV operators and consider how Horizon stack could be utilised? Lasers on outside of HC connector. Laser footprint onto Horizon LMRP landing plate (upper plate on BOP)
- Lateral movement is a risk with currents – use marker to rehearse accuracy of placement – In plan
- How to manage loss of visibility when landing BOP? Referencing between stacks? Lasers.
- DIII is the right rig for this work but need rig DPO operators involved in procedures/working
