Subject: STR Approval Process
Attachments: Approval process (2).ZIP

All,

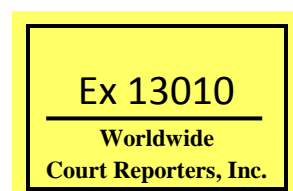

Please see the attached "STR Review Process Flow" charts for Louisiana and the Eastern States. The SCAT team developed this process over the past few days with input from the USCG, NOAA, SCAT Team members, Operations, and the EUL. This was based on a discussion at a SCAT program / UC situational status brief held on Monday, Feb 14 with C&GS members present or online. The meeting discussed, reviewed and agreed on the general flow and timing to complete STRs in an efficient and accurate manner. The attached flow charts are the embodiment of that discussion.

The attached process flow will be used for all STRs from this point forward. The success of the process is shown in the Louisiana Lafourche Parish STR that went through the pre-review notice and final approval in 4 days and 1.5 hours and the three MS STRs in 4 days and 16 hours. This is what will make this response efficient and environmentally sound and will recover any oiled shoreline quickly, minimizing or eliminating any potential future damage to the environment.

Please insure that all rotational personnel have received this Process Flow and also forward to anyone who is not listed above and needs to have this information.

Thanks to everyone for contributing to this process and to the SCAT Team for developing the process. Please advise if you have any questions.

CONFIDENTIAL

STR. REVIEW PROCESS FLOW FOR LOUISIANA

- The first 24 hr. Period: The issuer should not assign an STR number and also ensure that "DRAFT" in shown in a watermark within the document.
- The 48 hr. Period: When the document is issued for agency / stakeholder review the STR should be assigned a number. The document should now include maps, figures etc.
- If comments are not received by the end of the 48 hr. period, the STR will move to the final 24 hr. approval process.

FOSC (Federal On-Scene Coordinator) **OSC** (Operations Section Chief) **CG** (US Coast Guard) **PSC** (Planning Section Chief) **UFWS** (US Fish & Wildlife Service)
NPS (National Park Service) **NOAA** (National Oceanic & Atmospheric Administration) **EUL** (Environmental Unit Leader) **SOSC** (State On-Scene Coordinator)
OPS (Operations) **NMFS** (National Marine Fisheries Service)

STR. REVIEW PROCESS FLOW FOR EASTERN STATES

- The first 24 hr. Period: The issuer should not assign an STR number and also ensure that "DRAFT" is shown in a watermark within the document.
- The 48 hr. Period: When the document is issued for agency / stakeholder review the STR should be assigned a number. The document should now include maps, figures etc.
- If comments are not received by the end of the 48 hr. period, the STR will move to the final 24 hr. approval process.
