**Subject:** DISPERSANT REQUEST

Admirals,

I understand our request for dispersant application is on hold. I feel compelled to tell you the consequences of this decision. We are applying approximately 5 gallons an acre which is a 1 to 20 ratio of dispersants to oil. Given we want to apply 32,000 gallons today, this would amount to 640,000 gallons of oil dispersed, - 640K less hitting the shorelines LA, AL, and FL. Even if we de-rate this by 50%, 320K is still formidable and way exceeds what we will skim or burn on the water today.

V/r,

Roger

CONFIDENTIAL

HCG583-016871

1. The first part of the document is a letter from the President of the United States to the Congress, dated January 1, 1861. It is a very important document, as it sets out the President's policy for the new year. The President states that he is pleased to see the Congress assembled, and that he is confident that the country is in a good position to meet the challenges of the future. He also mentions the recent election of Abraham Lincoln as President, and expresses his confidence in the new administration.

2. The second part of the document is a report from the Secretary of the Treasury, dated January 1, 1861. It provides a detailed account of the financial state of the country at the beginning of the year. The report states that the country is in a sound financial position, with a strong and stable currency. It also mentions the recent increase in the national debt, and expresses confidence that the government will be able to manage the debt effectively.
