Subject: Data release for Anadarko
Importance: High

All,

Bob Quitzau (Anadarko Drilling Engineer) has been seconded to the IMT operations teams since the beginning of the event, and has been a key member of the engineering team for Top Kill, Static Kill and the Relief Wells.

Last week, Bob asked for a copy of the Static Kill & Cement job data so he could analyze the data and support the decision making process.

I made a verbal request for approval to provide the job related data to Bob, but have not received a formal approval. If you are like me, you have been too busy with the meetings and tests to think beyond the short term activity set. I have failed to follow up on this request for those very reasons.

Please provide a written reply to this request so I can either provide the data to Bob, or explain the reason for denial.

Your prompt attention to this is much appreciated.

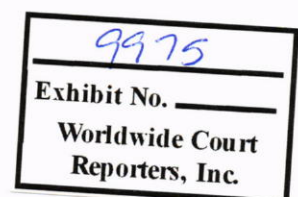

Best Regards,

Keith R. Powell
